Why Use Kintone in My Project? 🤔

Free - Kintone is completely free for developers. No credit card required!

Easy - Easiest way to setup a web database for your project! No server to setup!

Quick - Build a web app quickly with just HTML & JS!

Resources - Ask Kintone staff for help! Lots of videos & articles to refer to!

Store Your Data in Kintone Web Database

Create & Configure Databases Easily

- No need to set up a server
- Simple GUI to setup the database

Simple to exchange data with Kintone

- Lots of API endpoints to interact with your data
- Type safety built-in

Traditional vs. Kintone Databases 😐💡

Traditional Databases 😐

Requires a high-level understanding of databases

Servers need to be constantly running & maintained to be accessed

Kintone Databases 😊

Databases are created with intuitive drag-&-drop GUI

No servers set up required

A screenshot of the Kintone app builder interface. It shows a 'Sales & Leads' app with a 'Form' tab selected. The left sidebar lists various field types: Label, Text, Rich text, Number, Radio button, Multi-choice, Date, Date and time, Time, Attachment, Link, Department selection, Related records, Blank space, Field group, Record number, Created date/time, and Updated date/time. The main area shows a form for 'Leads & Sales' with fields for Sales Representative, Contact Info (Company Name, Contact Name, Job Title, Email, Telephone Number), and Product Info (Product Name, Product ID, Unit Price, Quantity).

Space Invaders

Created by @will_yama & @ahandsel - Article

Run a Space Invaders game on a Kintone App!

Game specifications (number of aliens, aliens' health, etc.) are specified as Kintone records.

High scores can also be stored in Kintone.

IoT Samurai Swords

Created by @RyBB - Article

Users are challenged to slice their enemies as quickly as possible with a samurai sword!

- Sensor records the sword action speed
- Kintone hosts the game, scoreboard, & IoT data
- Doll's magnetic head falls off when the user wins

Hibotan / Flowerpot Project

Created by Nobuyuki Furukawa - ヒボたん

- A moving flowerpot that uses **Kintone** as the backend to store sensor data.
- Sensors are attached to a **mbed** microcontroller & periodically send data to Kintone via Node.js.
- Node.js checks Kintone's sensor values over time and controls the motors of the flowerpot.
- The flowerpot moves to a sunnier place.

Get your free Kintone Web Database

Go to [Kintone.dev/new!](https://Kintone.dev/new)

Fill out the Developer License Registration form for your free Kintone Subdomain!

- Use Chrome or Firefox (*NOT Safari*)
- ⚡ Accept Cookies First
- 🛡 Only use lowercase, numbers, and hyphens (-) for subdomain names
- Ex: weekend-hacker4life
